OUR CAMP WAS GREAT.....

It was a really fun time, friendships and challenges for all, we participated in drama all together in front of 150 teenagers with their parents, even though we were very nervous we encouraged each other saying: "we are not alone we are all together on the stage" This made the girls feel more secure in their lives and showed that we can overcome fear using their gifts. A month later they were all very keen to go to a children's home called "Alalay" and we did some evangelism through drama and serving there. Now on 10th September 25 teenagers will be visiting us from "Casa de Oración" church where we all go, and they are very happy preparing new dramas for when they come to El Alfarero.

ART AND CREATIVITY.....

We visited all the places that produce artwork with clay, motivating the girls in new ideas to make their own figures, as we now have these classes in the home as part of a therapy where they can discover their creativity, relax and through what they from with their hands they can see how our lives can be molded through our potter Jesus.

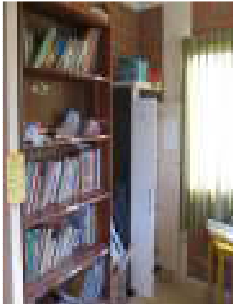

OUR GRAND "LOVE FEAST".....

It was a time focused just on the girls where all the staff served them, they dressed for the party, walked along a red carpet to their place at the table, we sang a song, we did a drama for them, we showed a video about unity as a family and served the special dinner. They didn't have to do anything. We shared we with that through service we were giving our love each day and it was what God had put in us to give to them. That night we all learned to not forget what God does each day for us.

This year God responded to Angela's prayer. She is one of the best students in her school. This is a challenge she set herself and she made it! Alex also was one of the best students this year.

We have a project to install a built-in cupboard in the classroom as a library, plus chairs and tables to use there. I thank those who wish to support this project financially and be part of this. It would be a great help for the girls in having better order and better facilities for the teachers who make so much effort in the girl's academic education.

THANKS.....to God and your willing hearts is how we are able to continue on each day towards the goal. It is a joy to be able to serve God each day through each good or difficult situation. We pray for you with lots of love ...the girls remember you in their prayers. Thanks for reading this letter. I ask you to be praying for more girls in the home, that we look after them and present Jesus to them through all we do and support me in prayer for my health and perseverance in this calling. I trust that God touches your life so that you can serve Him in restoring lives, offering then your love personally to those in need according to His purpose.
